

**ABSTRACT**

A method generates a graphical portion of a graphical user interface (GUI), the graphical portion concerning various components of a storage domain. Such a method may include: illustrating a tree hierarchy; including, in the tree hierarchy, a node belonging to a first node-category, the first-category node representing the total instances of a particular type among the storage-domain components, and including, in the tree hierarchy, one or more subset nodes belonging to a second node-category reporting to the first-category node, each second-category subset node representing a subset of the total instances of the particular type of storage-domain component. Related apparatus and machine-readable media having instructions can each include features similar to elements of the method.
